

Smarter Than Ever

- Bluetooth-enabled for a more reliable connection
- Wireless connectivity for easier use and less snagging

Simpler Than Ever

- Redesigned closures featuring a magnetic buckle for users with impaired dexterity or pinch strength
- Easier disassembly of pads and shells for hassle-free cleaning and maintenance

A Redesigned Clinician Application

- Streamlined workflow designed around clinicians' real-life needs
- Shorter training time and a faster path to proficiency

Enhanced Customization

A More User-Friendly Belt

- Snugger fit and greater comfort
- Better hip/sensor alignment while sitting and standing
- More accommodating of atypical hip morphologies
- Simplified sizing:
1 belt + 2 lumbar strap options
- Improved usability for activities of daily living (e.g., ability to go to the washroom without completely removing the device)

Proven Results

- Significant improvement in gait quality for chronic stroke patients after 3 sessions of use (Jayaraman et al., 2020)
- Customization expanded to improve usability with wider number of clinical conditions
- Deficit-specific parametrization, with descriptions designed and tested for clinical users
- Customized workflow for novice and experienced clinical users
